

# Wireless Emergency Alerts (WEA)

**Wireless Emergency Alerts**, or **WEAs**, are emergency messages sent to your cell phone by public safety and weather officials to grab your attention and help keep you safe during an emergency.

A WEA can warn you about a potential hazard in your area. You will be alerted about hazards like floods, tornadoes, wildfires, winter storms, or other emergencies in your area. A WEA can alert you about a missing child with an **AMBER Alert** too!

Can I get a WEA?

Ask parents or adults to check with your wireless provider.

- WEAs are sent to help you know about dangers and can include life-saving information to keep you safe during an emergency.
- The WEA message will “pop-up” on the screen of a cell phone or other wireless device with a loud beeping sound, vibration and a short warning about the danger.
- There are no charges or fees for receiving WEA alerts.

**Wireless Emergency Alerts** or WEAs, are free one-way emergency messages sent from local public safety officials or the National Weather Service directly to cell phones in the local area of an emergency.

**AMBER Alerts** are public safety messages about missing children.
